### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Uusimaki (US 6,571,086).

Regarding claim 1, Uusimaki teaches a foldable mobile terminal comprising a first housing and a second housing connected to each other to be supported so that they can freely be opened/closed (see fig. 2; col. 4, lines 54-67. The first housing part(2) and the second housing part(3) of the wireless communication device 1 of Uusimaki which can freely be moved into open and closed positions by a hinge(4) reads on the foldable mobile terminal comprising a first housing and a second housing connected to each other to be supported so that they can freely be opened/closed of the present invention), comprising:

an external display part that can be viewed in a closed state on the first housing or the second housing (see fig. 1, item 6a; col. 5, lines 6-28. The display 6a located in the

second housing part of the wireless communication device 1 in the closed position reads on the external display part that can be viewed in a closed state of the present invention); and a side face key on a side face of the first housing or the second housing (see figs. 2 and 3; col. 5, line 55 to col. 6 line 10. The control means 7 which can function like a control button, and can be located on the side of either first or second part of housing parts 2 and 3 reads on the side face key on a side face of the first housing or the second housing of the present invention), wherein when a soft key icon is displayed on the external display part, the side face key is used as a soft key corresponding to the soft key icon (see figs. 5 and 5; col. 8, lines 45-64; col. 10, lines 46 to col. 11, line 40; col. 12, line 8-13. The "Menu", "Mem", "Ctr", "Select", "Search" that can be highlighted by cursor 204 read on the soft key icon displayed on the external display part of the present invention since the menu functions of Uusimaki can appear on both displays 5a or 6a simultaneously).

### ***Allowable Subject Matter***

3. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claim 2, Uusimaki, as mentioned above, teaches the limitations of claim 1, but fails to disclose that the external display part, together with the displayed soft key

icon, position information showing a position of the side face key corresponding to the soft key icon is displayed as specified in the claim.

### ***Information Disclosure Statement***

4. The information disclosure statement (IDS), submitted on 01/03/06, is being considered by the examiner.
